## Letter of Reference

To whom it may concern,

BeneDictum Kft has been providing translation and interpretation services to Siemens Hungary and Siemens Germany for over 15 years.

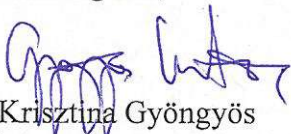

For our site in Késmárk utca, they have prepared translations amounting to more than 1,500,000 characters in various language pairs: DE-HU, HU-DE, EN-HU, HU-EN, HU-TR.

When the manufacturing of turbine blades was moved from Berlin to Hungary, the translations necessary for the installation, commissioning and operation of machines were carried out by BeneDictum Kft., with which Siemens was absolutely satisfied.

The documents to be translated were only available in PDF, yet BeneDictum Kft. solved the editing of the documents perfectly. They were able to quickly – even by the next day – and professionally translate large volumes of texts

I absolutely recommend them to clients who need interpretation and translation services for large-scale industrial projects, for the construction of factories and for the installation of industrial processes. I give my consent to BeneDictum Kft. using this letter of reference for marketing purposes.

Best regards,

Krisztina Gyöngyös  
internal communication coordinator
